

Honda Rancher & Foreman

Plow Mount

PART # 105045

Hardware Kit: HK-108

Kit Components:

Qty.	Part Description
1.....	Plow Mount Plate
2.....	5/16-18 x 1-1/4" x 1 3/4" U-Bolt
4.....	5/16-18 x 1-1/4" x 2" U-Bolt
12.....	5/16-18 Hex Flange Lock Nut

INSTALLATION INSTRUCTIONS:

Honda Rancher 420 (2007-2013) Instructions:

1. Place mount plate up to machine using the hole in the skid plate (A) for alignment. Mark the drill locations (B) on the skid plate using the mount plate as a template and drill U-Bolt holes.
2. Place 2" U-Bolts (C) and 1 3/4" U-Bolts (D) on machine through holes that were drilled in the skid plate. See Figure 3 & 4 for u-bolt locations.

Note: Shown without skid plate for clarity. Skid plate will not need to be removed for mount plate installation. For ease of U-Bolt install you may want to remove the side panels on the machine.

3. Install mount plate loosely to frame using U-Bolts and 5/16" flanged lock nuts.

Note: The application for this machine is only designed to use the front 2 U-Bolts and the middle U-Bolts, the rear locations will remain empty.

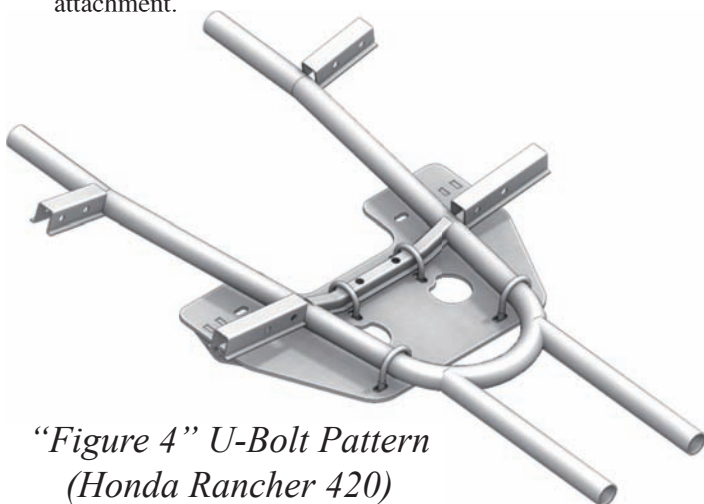

4. Tighten down all nuts. (Make sure U-Bolt ends are even.)
5. See ATV Plow Tube System instruction manual for tube attachment.

Honda Foreman 500 (2012-2013) Instructions:

1. Place mount plate up to machine using the hole in the skid plate (E) for alignment. Mark the drill locations (F) on the skid plate using the mount plate as a template and drill U-Bolt holes.
2. Place 2" U-Bolts (G) on machine through holes that were drilled in the skid plate. See Figure 6 & 7 for U-Bolt locations.

Note: Shown without skid plate for clarity. Skid plate will not need to be removed for mount plate installation. For ease of U-Bolt install you may want to remove the side panels on the machine.

3. Install mount plate loosely to frame using U-Bolts and 5/16" flanged lock nuts.

Note: The application for this machine is only designed to use the front U-Bolts and the rear U-Bolts, the middle locations will remain empty.

4. Tighten down all nuts. (Make sure U-Bolt ends are even.)
5. See ATV Plow Tube System instruction manual for tube attachment.

Honda Rancher 420/Foreman 500 (2014-2015) Instructions:

1. For this mount you will need to cut your skid plate. Measure out and mark the cut lines shown in Figure 8.

2. Remove the skid plate cut the center section out of the plate and reinstall the two larger halves of the plate.

Note: The mount plate will fit over the top of the 2 pieces of the skid plate and sandwich it to the machine.

3. Place the four 2" U-Bolts (H) supplied with your mount hardware kit on the machine in the locations shown in Figure 9. The two front U-Bolts will go through the triangular section in the machine frame.

4. Install mount plate loosely to frame using U-Bolts and 5/16" flanged lock nuts.

Note: The application for this machine is only designed to use the front U-Bolts and the rear U-Bolts, the middle locations will remain empty.

5. Tighten down all nuts making sure that the mount stays centered on the machine. (Make sure U-Bolt ends are even.)

6. See ATV Plow Tube System instruction manual for tube attachment.
